

GPS Antenna

The bracket for the GPS Antenna

Step 1

Recommendation: Seal with a suitable adhesive on the surfaces indicated

Mount the antenna on the glass pane facing the correct direction and insert the thread of the antenna into the hole in the glass pane.

Step 2

Disassemble the building components of the original nut of the antenna.

Step 3

Mount the plastic part, shown in the picture, on the reverse side of the glass pane and fix with the hexagonal nut

Attention: First pull the connection of the antenna through the opening in the middle of the plastic part, and then lay the cable properly into the designated opening.

Warning: Do not pull the nut too high, in order to avoid the glass from breaking.

Step 4

Press the plastic part shown in the picture, until the hooks have properly clicked into on both sides.

Finished
